SURFACE PREPARATION
Surfaces should be clean, dry, sound and free of dust, dirt, excessive chalky material, grime, grease, oil, wax, mildew, wallpaper adhesive or any contamination that may interfere with adhesion. If unsure, always wash surface with a household ammonia and water solution, or an appropriate cleaning solution. Remove any unsoundly adhered coatings. Sand any remaining paint film edges smooth with the surface. Lightly sand exposed exterior wood with 80 to 100 grit sandpaper to remove loose or weathered wood fibres. Attempt to remove existing stains by washing, sanding, scraping, etc.
Kill mildew with a suitable mildew Killer such as Rust-Oleum FK 111.
Remove rust and clean metal and new galvanized substrates with a suitable cleaner such as Rust-Oleum ND14. On wood first spot prime knots with Zinsser® B-I-N Primer-Sealer before priming full surface with Bulls Eye 1-2-3.
